Mr. Nguyen Van Cong

Chairman of BoD

With the philosophy of "Assurance for the future", we always aim to give sustainable development to our company, client, and community.

LETTER FROM THE CHAIRMAN OF THE BOARD OF DIRECTORS

“ Consultant and Inspection Joint Stock Company of Construction Technology and Equipment (CONINCO., JSC) is an investment and construction consulting company, a multi-disciplinary operation in national scope, effectively cooperating with many big companies and economic groups worldwide.

With the philosophy of "Assurance for the future", we always aim to give sustainable development for our company, Clients, and the community.

Founded on April 16th, 1979, from a research institute specializing in technology and construction organization, after 45 years of construction and development, generations of leaders and employees of the Company have made endless efforts to build and develop the CONINCO brand name to become one of the leading companies in the field of construction consulting.

Currently, with the operating model of a public joint-stock company, successfully and effectively implementing the Franchise system model, receiving the attention and trust of leaders at all levels and sectors, our valued customers and partners both domestically and internationally, we are determined to make the CONINCO brand name increasingly develop and grow, providing high-quality services, contributing to the sustainable development of the community, and fostering the prosperity of the nation.

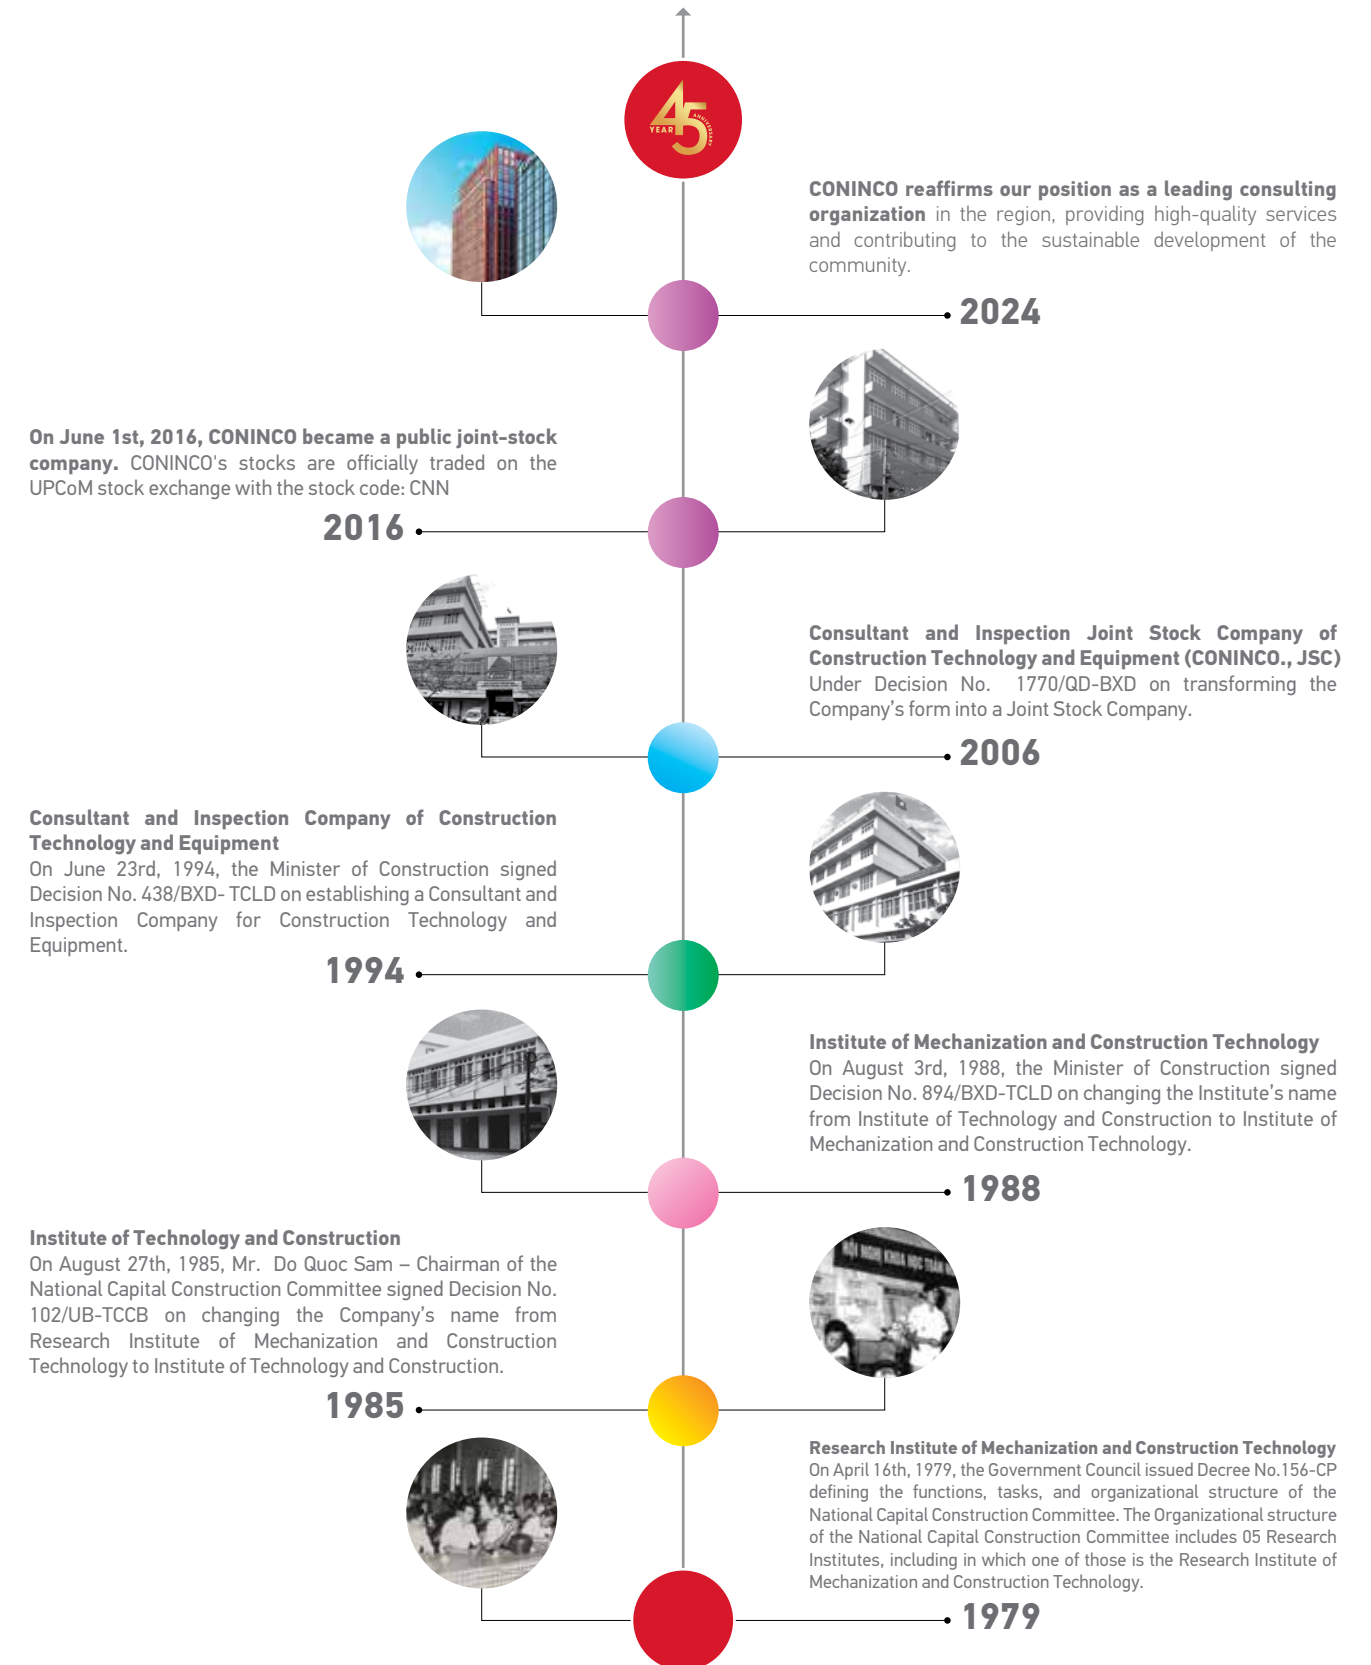

”

COMPANY HISTORY

After 45 years of construction and development, CONINCO proudly stands as a leading company in the field of construction consulting in Vietnam. The CONINCO brand name is closely associated with the quality of thousands of large and small projects spreading across Vietnam and Southeast Asia, creating sustainable values and "Assurance for the future".

To achieve today's achievements, every member under the common roof of CONINCO always adheres to the principles of "unity, creativity, professionalism, and dedication".

CONINCO is a collective group of individuals who dare to think, dare to act, and dare to pioneer to create world-class projects.

BUSINESS PHILOSOPHY

For CONINCO, we do not mind sharing our knowledge and experiences. Because sharing is the development. Life also stems from sharing and only sharing and understanding can help us exist forever.

MISSION

To Client: Provide qualified and effective consulting services, and give increasing benefits to the Clients at present and in the future.

To Community: Bring sustainable development values for the environment, convenience for life, and assurance for the future.

Working Environment: Act together to create a dynamic, creative, self-control working environment, and promote individuals to build their brands.

VISION

With the guideline "Global vision - Realistic action" and "The larger vision - The more effectiveness" in resolving complicated problems with simple methods.

Connecting people with gravity as the world is created by gravity, becoming a link in the chain of global leading trademarks.

CONINCO'S CULTURE

BUILDING ETHIC VALUES

This means building a foundation of all other values which is also the basic factor to create a stable brand name. CONINCO raises Clients' trust, builds prestige, and provides Clients with reliance, conscientiousness, and royalty.

ESTABLISHING THOUGHT FOR ACTION

Providing Clients with the most convenient and effective solutions while tending toward stable value for the community and the future.

CREATING WORKING ENVIRONMENT

Where the staff is respected, all employees think, do, and act with a strong determination to enhance the trademark. Each employee embodies CONINCO's culture and brings it to Clients and the community.

OPERATING PHILOSOPHY

BUILDING WORKING CHARACTERS

- Heart: Conscientious, responsible, united
- Ethics: Truthful, honest, prestige
- Mind: Researching, creative, vanguard
- Unassumingness: Receptive, inquiring, modest

CORE VALUES & BRAND NAME VALUE

- Appreciation of prestige - Trust - Solidarity - Respect
- Creation, dynamism - Quality, value
- Professionalism, intensive - Cooperation, training

OPERATING PHYLOSOPHY

- I think means I exist
- Master the skills, get the success
- Solidarity is the strength
- Sharing for development

QUALITY POLICY - DIGITAL TRANSFORMATION

The Quality Policy of Consultant and Inspection Joint Stock Company of Construction Technology and Equipment (CONINCO., JSC) is the provision of consulting services on construction technology and equipment with the best quality to meet all the demands and expectations of the Clients by everlasting improvement and service quality.

The Company incessantly perfects the services in the high specialization, attaches special importance to work quality, assures service quality to meet all the demands promptly, and makes the Clients believe in the company's stable development in the future with the philosophy: "Assurance for the future".

Consultant and Inspection Joint Stock Company of Construction Technology and Equipment (CONINCO., JSC) commits to establishing & maintaining the Quality Management System corresponding with International Standard ISO 9001:2015 and regularly improving the effectiveness of the Quality Management System.

CONINCO is currently undergoing a digital transformation, simultaneously implementing two software solutions for internal company operations and project management for clients. This represents a thorough transformation of individuals and organizations in terms of working, operational methods, and corporate culture based on digital technologies. CONINCO has progressively digitized the entire business operation, enhancing the speed of automated task processing, fostering an online working environment, and facilitating the sharing of common data from personnel to contracts, finances, and internal communications. The company also utilizes cloud-based construction project management software, enabling connectivity, sharing, quality control, safety, and risk management for construction projects.

CONINCO shall strive for the regional scale high-caliber multi-principle consulting organization with high professional qualifications and be one of the leading organizations in the field of consultant and inspection nationwide.

PROVIDING HIGH-QUALITY SERVICES, CONTRIBUTING TO THE SUSTAINABLE DEVELOPMENT OF THE COMMUNITY

TYPIICAL PROJECTS

INTERNATIONAL COOPERATION

With a global integration strategy and the goal of expanding the development of products and services, the company's leadership continuously encourages and promotes comprehensive and professional international cooperation with partners across continents.

International cooperation aims to import resources and gray matter from big global corporations. It also aims to bridge the technological gap with advanced countries. CONINCO is committed to providing the best services to customers to create products that meet international standards.

As one of the leading construction consulting brand names in Vietnam, CONINCO has become a reliable partner for many big companies and foreign investors. We confidently support numerous international brand names in the field of construction consulting, participating in the implementation of key national projects. The values we bring include big contracts, high-quality awards, learning opportunities, training, and technology transfer cooperation, as well as providing high-quality labor to the international labor market, creating tangible and intangible values for CONINCO.

TRAINING & SCIENTIFIC RESEARCH

Has been descended from the Institute of Mechanization and Construction Technology, Consultant and Inspection Joint Stock Company of Construction Technology and Equipment (CONINCO., JSC) has continued the tradition of Scientific – Technological research activities and annually we have been entrusted to perform some scientific State-level and Ministry-level research projects.

The Company’s Scientific Council includes members who are leading professors and experts in the country.

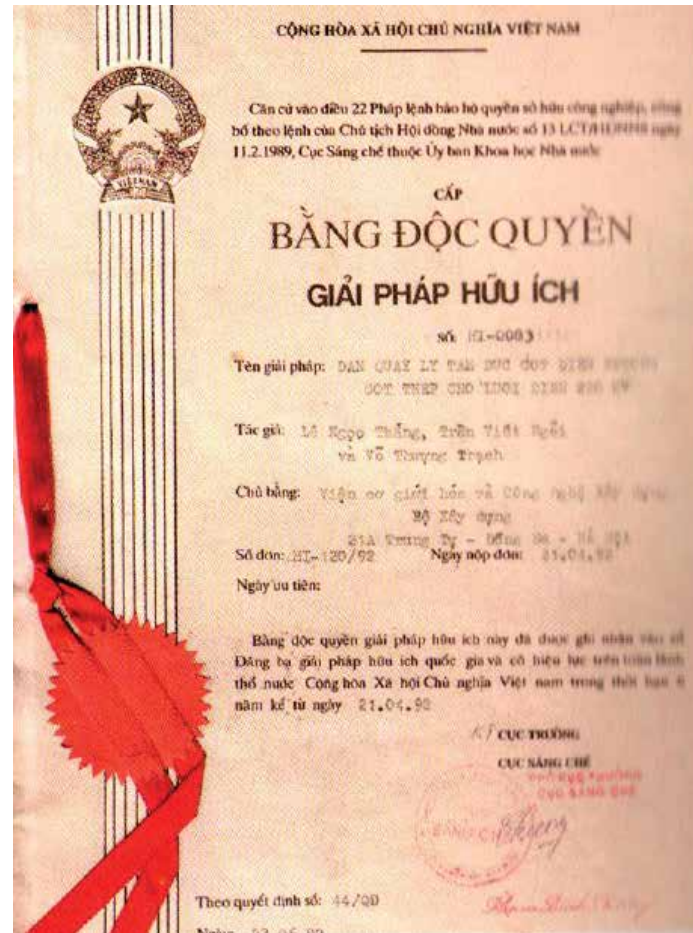

Exclusive Patent License

– Research and design of a centrifugal casting tower for manufacturing reinforced concrete power poles for the 220 kV power grid, including the study of the technological process, casting tower, and molds, as well as the design and manufacturing of accompanying equipment to ensure the synchronous operation of the production line. This is the first research and design project of its kind in Vietnam and has proven to be effective. The project was granted a patent for a useful solution with the number HI-0083 by the Patent Office in 1992.

– Research and design for the manufacturing of a 4m3 concrete transport vehicle.

Compilation and Translation of Construction Standards:

- TC 34-12: TCVN Pile driving equipment - Safety requirements
- TC 25-12: TCVN Excavators and earthmoving machinery - Safety - Requirements for hydraulic excavators
- TC 36-12: TCVN Excavators and earthmoving machinery - Safety - General requirements
- TC 68-13: TCVN Excavators and earthmoving machinery - Safety - Requirements for bulldozers
- TC 69-13: TCVN Excavators and earthmoving machinery - Safety - Requirements for backhoe loaders
- TC 70-13: TCVN Excavators and earthmoving machinery - Safety - Requirements for excavators with a reverse bucket
- TC 71-13: TCVN Drilling equipment - Safety
- TC 72-13: TCVN Steel tube scaffolding - Technical requirements and testing
- TC 01-13: QCVN Scaffolding, steel formwork in construction
- TC 88-15: TCVN Steel plates used as formwork in construction - Technical requirements
- TC 105-15: TCVN Products of high-strength PVC drainage systems
- TC 04-15: TCVN Manhole for PVC high-strength drainage system

Scientific Research

- Compile the superintendence of installing cement production equipment by revolving burner technology;
- Research some factors affecting concrete’s quality inspection on the construction by ultrasonic method [RD 30-01]
- Research to estimate the technology level of the quality inspection of work of civil and industrial constructions in Vietnam [RD 31-01];
- Research, manufacture some construction equipment for urban infrastructure projects: Period 1: Research and calculate, design, testing manufacturing – Testing clamshell bucket to water-power hole, installed on drilling rod of bored pile driller to construct barrette pile and diaphragm wall [RDN 10-02];
- Research and compile introductions and procedures of project verification, technical design, cost estimation, total cost estimation;
- Research and compile Manual of creating technical introduction during work in civil and industrial constructions [TC 32-09];
- Compile Manual of introductions of urban lighting planning [TC 73-13];
- Research and create the list of Scaffolding, Form-work Standards based on foreign Standards [TC 84-13]

Training

Our Board of Management always encourages Staff to strive studying and applies various forms of training such as: holding short term training in the courses of skill improvement and dissemination by the top national and foreign experts; Nominating Staff to attend high professional short and long term, Master or Doctor programs in Vietnam and foreign countries as Japan, America, England, France, Germany, Belgium, Korea, Taiwan...

PARTICIPATION IN PROFESSIONAL ORGANIZATIONS

Originating as a research institute, CONINCO has always upheld its tradition, focusing on and actively participating in the activities of professional organizations such as: the Vietnam Association of Structural Engineering and Construction Technology, the Vietnam Architects Association, the Vietnam Association of Construction Consultants, etc. The team of experts and consulting engineers at CONINCO has made significant contributions in the development of standards, regulations, scientific research, and providing feedback on legal policies in the construction field.

INTERIOR FINISHING MATERIALS

CONINCO Vietnam Japan Trade & Construction Joint Stock Company (CONINCO – VJ) specializes in providing interior materials genuinely imported from famous Groups of Japan that run in the field of interior material manufacturing. CONINCO – VJ also carries out the construction and installation of interior decoration.

The Company has invested and put into use many types of equipment, high-tech machinery of Japan to cater to the construction, installation, and decoration of interiors for civil and industrial works.

In addition, the materials used for construction such as glue and modern technology facilities are also applied due to the Japanese Standard to ensure the longevity of construction.

HEAT RADIANT AIR-CONDITIONING SYSTEM

With deep capability and experience, CONINCO has transferred the technology of Heat radiant air-conditioning by Samyang (Korea).

The Heat radiant air-conditioning system not only improves the indoor atmosphere, without noise and airflows but also does not affect the architectural side as well as create a large space because the system would be installed inside the ceiling and floor.

OTHER SERVICES

CONINCO TOWER

Having been built and put into operation in December 2019 after 2 years of construction, CONINCO Tower has a scale of 4 basements, and 20 floors, with a total floor area of 26,000 m2 and an area of nearly 2,000 m2. As the crystallization of 40 years of construction and growth, a symbol of sustainable development, and assurance for the future, CONINCO Headquarters Building

- CONINCO Tower was honored to receive the award “VECAS AWARD 2020”; “High-quality construction works in 2019” for the Ministry of Construction and is also one of the 9 works certified by the Ministry of Construction and the United Nations Development Program (UNDP) to meet the standards “Energy-saving works”.

BUILDING OPERATION MANAGEMENT SERVICE CENTER (T.BMS)

As the leading consulting company in Vietnam, with more than 40 years of experience in construction investment management, CONINCO has directly managed and operated CONINCO Tower. Established in September 2020, aiming at a professional working model, the Center has been organizing activities to help the building operate in the best way while minimizing incidents, and ensuring the safety of the units in the building.

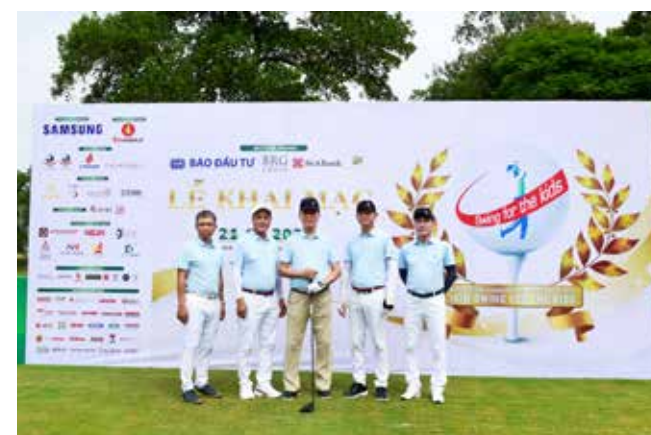

Currently, the center is carrying out the following activities:
The operation, and maintenance of technical systems of the building;
Security and protection;
Reception, customer care;
Cleaning and taking care of ornamental plants;
Marketing, management, and office leasing;
And other convenient services: Canteen exploitation organization, event organization...

SOCIAL ACTIVITIES

THE EFFICIENCY, BENEFIT FOR ENTERPRISE, SOCIETY AND EMPLOYEE

In the spirit of “The leaves protect tattered one”, in sympathy and sharing over the pain, and loss of the Community, CONINCO actively participates in charitable activities, school sponsoring, helps poor people, and supports finance for charitable organizations. In addition, our company leadership also focuses on the spirituality of the Employees by creating chances for exchanges and sticking together, to strengthen solidarity and improve social knowledge as well as love for the Company.

ACHIEVEMENTS & REWARDS

Over 45 years of construction, operation, and development, CONINCO is honored to receive medals awarded by the Party and State. Along with that, there are certificates of merit and awards for quality work from organizations and customers to recognize the Company's contributions to thousands of projects across the country.
